

CLOUDICAL

Delivering CloudExcellence

Cloud Architect (m/f/d)

You are an all-rounder among the cloud specialists.

You love to design the architecture of cloud based applications using state of the art technologies.

You strive for knowledge, excellence and understanding.

You share your knowledge with us, our customers and partners.

You see yourself as a visionary and are characterized by open-ness and tolerance, both interpersonal and technological.

You have a CloudNative Mindset, speak fluent german and English and you can easily adapt to new situations.

YOUR RESPONSIBILITIES

- Advising our customers on the creation of cloud based applications (Cloud Native) and on cloud migration
- Participation in the development and implementation of cloud strategies
- Support for customer presentations, bid preparations and complex customer inquiries
- Development of monitoring-, management- and business continuity strategies
- Participation in the management of the client's cloud infrastructure
- Design of briefings and workshops for employees as well as customers
- Building up expert knowledge in the areas of IaaS, PaaS & SaaS (AWS and/or Azure as well as Cloud Native)
- Continuously staying up to date with IT security knowledge, update the company and protect customer and company data
- Ongoing training and proof of concepts on new technologies, methods and tools

WHAT YOU SHOULD BRING

- Successfully completed, subject-related college degree or comparable long-term, professional experience in a relevant field
- Practical experience in the cloud, especially in the relevant technologies mentioned above
- Many years of experience in implementing (cloud-based) software and good knowledge of software architectures
- Knowledge of subject-specific technologies, such as relational databases, web servers and methods for data encryption
- Experience with Java, Node.js, PHP, Python or Ruby on Rails.
- Ideally experience with database migration tools
- Strong consulting skills, flexibility and communication skills at all levels
- Fluent English, German, knowledge of Polish, other languages are an advantage
- Unrestricted readiness to travel

Why Cloudical?

At Cloudical you do pioneering work for companies on their way into the cloud.

We are Cloudical, a knowledge company with a technological background. We advise and support organizations in the design, creation and use of cloud based applications. We see knowledge as the core of our business, which we continuously build up and openly share with our organization, our partners and customers. We bring together visionaries who think big and in all facets and who are 100% solution and customer-oriented.

WHAT DO WE OFFER?

Room for #cloudexperts
